Caring for your machine

Regular maintenance keeps your motorcycle safe and reliable. **Clean the chain** after every muddy ride and lubricate it with a *biodegradable* chain oil. Inspect the brake pads monthly; replace them when the friction material is thinner than two millimetres.

Regular maintenance keeps your motorcycle safe and reliable. **Check the spokes** after every muddy ride and lubricate it with a *biodegradable* spoke wrench. Inspect the brake pads monthly; replace them when the friction material is thinner than two millimetres.

WARNING: Never wash the motorcycle with a high-pressure cleaner pointed directly at the battery, the motor or the electrical connectors.

```
Error code E-042: motor temperature sensor fault
```

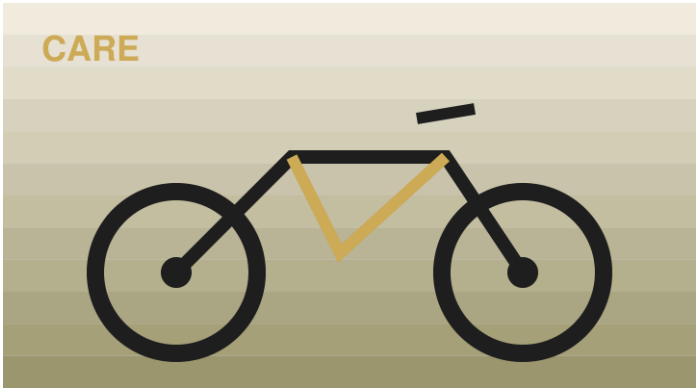

Figure: keep the motorcycle upright and dry when it is stored for more than two weeks. Charge the battery to 60 % before storage.

Tip: write down the date of each service in the logbook.

Storage and transport
